

ECONOMIZER FAULT DETECTION & DIAGNOSTICS

California Energy Commission (CEC)

Approved and Listed

- A 2013 Title 24 requirement
- Leverage your existing Alerton EMS
- Enhance your existing BACnet system
- Receive economizer faults immediately
 - At the workstation & zone level
 - On your smart device
- Reduce time to troubleshoot economizer problems with remote monitoring
- Save money by guaranteeing proper economizer operation
- Ensure indoor air quality by maintaining outside air exchange requirements

Introducing the industry's first Economizer Fault Detection and Diagnostic system developed around a building automation system. Building operators no longer need to be concerned with addressing economizer faults at the physical location of the economizer. L&H Airco, in partnership with Alerton, has developed a viable and economical option when meeting this requirement of Title 24. This unique solution values your time and places live data at your fingertips.
